# T20 World Cup 2024 MVP Analysis

Step 1: Load Data using pd.read_csv()

Step 2: Merge datasets using match_id as the key

Step 3: Create 'is_wicket' column (1 if wicket_type is not null)

Step 4: Calculate runs per striker using groupby and sum

Step 5: Calculate wickets per bowler using groupby and count

Step 6: Create MVP DataFrame with runs, wickets, and total_points

Step 7: Sort MVPs by total_points and take top 10

Step 8: Display and visualize MVP stats

Top MVPs by Wickets

Top MVPs by Total Points
